

background filling profile

DUROFOAM is a closed cell polyethylene profile, which can be used to fill deep working or saw cut joints of industrial concrete floors. DUROFOAM is a support or DUROFLEX joint filler.

ADVANTAGES

- Helps to optimize the use of filler material
- Helps elastic movement of filler material
- Ensures optimising the height and width of joint gaps

TECHICAL DATA

- Easy to use
- Soft and elastic
- Close cell structure, not absorbent
- Tolerates changes in temperature
- Available with different diameters
- Grey coloured

RANGE OF PRODUCT

TYPE	DIAMETER	OUTFIT
DUROFOAM 6	6 mm	500 fm
DUROFOAM 10	10 mm	600 fm
DUROFOAM 15	15 mm	250 fm
DUROFOAM 20	20 mm	150 fm

INSTRUCTION FOR USE

It is very easy to install it, does not require any special tools. Pay attention so that the surface of DUROFOAM will be free from deflection. The appropriate diameter is 20-25% more than the width of the gap to be filled.

STORAGE

To be store in dry conditions.
Shelf life: unlimited
